

An affordable way to heat

Wondering how much it costs to run a space heater?

Our calculations are based on an average use of 8 hours per day, which is typical for supplemental heating in a primary living space. See how affordable staying warm can be!

ESTIMATED COST TO RUN A HEAT STORM HEATER 8 HRS

Heater Wattage	Daily Cost	Monthly Cost
1,000W	\$0.83	\$24.90
1,500W	\$1.24	\$37.35
3,000W	\$2.49	\$74.70
6,000W	\$4.98	\$149.40

Notes:

- Estimates are based on average electricity rates in Cache Valley, Utah.
- Actual costs may vary depending on location, electricity provider, and usage.
- For more precise calculations, refer to your local utility rates and consider using a real-time energy monitoring device.
